

## TP 100 PTO WOODCHIPPER

**LINDANA AS**

The TP 100 is a drum chipper with a vertical funnel, which falls into the Garden Series. It is a compact and effective wood chipper which is easy to manoeuvre around and which can handle branches of up to 100mm in diameter, typical of the sort of wood refuse from gardens and parks. Retraction and cutting material happens at the combination of the vertical chipper and the knives position on the drum in relation to the anvil. It is effective from 15 to 40 hp.

### The TP 100 comes standard with the following:

- Revolving ejector spout
- V-belt drive
- Two reversible knives
- Tool kit
- One anvil in Hardox 400

The chips from the Garden Series can vary in size from 5 to 20mm depending on the type of tree being cut. The end result is varied chips for laying as ground cover on beds or as layering on paths and walking areas. A 10 to 15cm layer of these chippings makes it almost impossible for weeds to grow through.

Garden	Model	□ HxW mm	Knives No.	Chip size mm	Capacity m3/hour	PTO		Weight Kg	Fuel		
						kW(hp)	RPM		Type	Use/ h	Tank ltr.
